

Virtuo Business Intelligence for healthcare

Business Intelligence (BI) solutions have been used in general industry for many years to help improve strategic and tactical performances. Virtuo Business Intelligence 2.0 has been specifically designed for the healthcare provider industry and enables healthcare professionals to monitor, analyze, and report on the various aspects of their business performance. Virtuo Business Intelligence is a comprehensive solution that includes powerful, yet cost effective BI software combined with MediSolution's healthcare industry knowledge and proven integration expertise that ensures you leverage the investments you have already made in your legacy systems.

The system can also be used for reporting to external state and federal agencies such as JCAHO. And finally, the most important feature of Virtuo Business Intelligence 2.0 is that it provides healthcare professionals with the information they need to take a proactive approach to measuring and improving their performances on a timely basis.

Provides the information needed to take a proactive approach to measuring and improving performances on a timely basis.

Specifically Designed for Healthcare

Virtuo Business Intelligence 2.0 collects and assembles data that can be used to monitor the performance of a single department, a division or the entire facility. Healthcare executives and departmental managers can use the solution to discover best financial and patient care practices and align those practices with strategies to measure performance against strategic goals.

This is accomplished through graphical views of information that provide instant visibility to trends, critical issues via alerts, and other important issues. Powerful dashboard visuals communicate complex business and operational performance issues quickly and intuitively. You can view and combine data in ways that let you immediately see areas that need attention, developing trends, and other indicators.

Virtuo Business Intelligence 2.0 Benefits

Turns data into vital knowledge

- Transforms the wealth of your stored healthcare data into knowledge that can be used to improve your performance
- Breaks down the vast silos of disparate departmental data systems and makes the information usable across the healthcare enterprise
- Uses data from your current systems and is adaptable to future system acquisitions
- Enhances access to and usability of information stored in your present systems

Benefits *(continued)*

Identify emerging trends and take action quickly

- Discover trends in real time across various departments and take action to establish best practices
- Re-allocate resources and budget quickly to address identified problem areas
- Understand immediately relationships between multiple metrics
- Address new legislative healthcare reporting initiatives on a timely basis

Effectively manage your organization

- Continuously monitors overall performance of your healthcare facility, providing timely data on which to base decisions
- Establishes key performance indicators (KPIs) for your facility to track success on financial performance, patient care, HR/Payroll, patient satisfaction, incident reporting and more
- Facilitates reporting to external agencies

Save Costs & Empower Staff

- Eliminate all manual interventions required to extract information and produce executive reports
- Provide your healthcare professional staff with the right information at the right time in the right place to help them make better decisions faster and adopt best practices more quickly
- Empower every level of management to effectively manage their budgets and staffs using real time data
- Supply healthcare managers with the tools that empower them to manage and assume responsibility
- Leverage Virtuo Business Intelligence's significant on-going product investment without the cost of building it yourself.

Features

Dashboards and Scorecards

- Dashboards and scorecards are assembled based on KPIs allowing for timely measurement of key metrics in an uncluttered and effective environment. Each department can choose the desired data to be monitored and from that time on, the selected data is automatically sent or "pushed" to the manager. No looking or searching for data is required.
- A rapidly growing list of over 100 pre-defined KPIs for you to choose from.

Analytics

- OLAP Cubes allow you to analyze your business performance and understand why specific events are occurring. You can drill-down into complex data, filter, sort to analyze trends, outliers, and rank specific variable that represent your business performance.

Integration

- Proven expertise to integrate with all healthcare applications
- Experienced in turnkey interface development
- Over 1,200 interfaces in more than 250 sites deployed to date

Security Features

- Utilizes overall Microsoft system security technology
- Internal security features determine who sees what information and at what level
- Access to data is controlled by password. Healthcare professionals only have access to the information they are authorized to see.

Intuitive interfaces with well-presented graphs and charts

- Screens are web-based, highly visual, customizable, intuitive, and easy to read
- Information displayed is specific to the healthcare professional viewing it
- No special departmental training required

Modular Solution

- Start small, start big, Virtuo Business Intelligence 2.0 is modular and allows you to easily meet your business objectives today and tomorrow.

Scalability

- Scalable to handle the needs of the largest or smallest healthcare facilities.

Features *(continued)*

Central Administration

- Although IT may act as the central administrator, other key stakeholder groups such as decision support, quality control, finance, or a combination of these can also act as administrator.

Training and Support Services

- Training can include helping healthcare professionals develop programs themselves, once resources are available.
- MediSolution is available for rush items, high volume times, resource issues, etc

Consulting

- Our consulting approach allows us to deliver a solution that is specific to the healthcare customer's needs and environment.
- Extensive healthcare expertise helps shorten your ROI
- Data management related to BI and integration of strategic planning and services
- Project management

Why Select Virtuo Business Intelligence?

Virtuo Business Intelligence 2.0 provides critical information that helps healthcare managers and executives monitor, interpret, analyze and understand the performance of their departments, divisions, or the entire hospital. The system also helps you “manage risk” and adopt best practices based on evidence reporting.

Data integration is central to business intelligence solutions. Virtuo Business Intelligence leverages MediSolution's recognized integration expertise. We know and understand complex healthcare data!

MediSolution significantly invests in the Virtuo Business Intelligence solution to allow you to easily and cost-effectively deploy business intelligence without incurring major costs associated to building your own solution.

About MediSolution

MediSolution (TSX: MSH), a Brookfield Asset Management company, is a leading healthcare and public sector information technology company, providing software, solutions and services to customers across North America. More than 500 hospitals and other healthcare facilities and close to 200 public sector and related organizations rely on MediSolution's systems to maximize their operational efficiencies, lower their costs, and improve the delivery of services.

MediSolution has two operating segments. The Resource Management Systems segment is comprised of Financial Management software such as accounts receivable, budgeting and materials management as well as Human Capital Management tools including human resource management, staff scheduling and payroll processing. The Healthcare Information Systems segment is comprised of clinical solutions such as patient tracking, electronic patient health records, pharmacy, radiology and laboratory software for healthcare organizations.
